SUITE 480  
PORTLAND, OREGON 97201

**SQUARE FOOTAGE OF BUILDING PROJECT:**

31,506 SF

**TYPE OF PROJECT: BUILD TO SUIT/LEASE**

**CONTRACTOR: DODDS COMPANY**

- ▶ Vestas Americas, formerly known as NEG Micon, is the North American division of Vestas Wind Systems A/S. Vestas is the world leader in wind technology and a driving force in the development of the wind power industry. The Champaign facility serves as headquarters for servicing existing turbines in operation throughout North America.
- ▶ Vestas' turbines are fast becoming a viable option as a renewable energy source. It is anticipated that by 2020, as much as 6% of America's electricity could be provided by Wind Power Projects.
- ▶ The Atkins Group built the premises to meet the specifications of NEG Micon, which included 6 jib cranes, a 25-ton crane bay, a turbine test bay, and extensive compressed air and electrical provisions. The improvements exceeded \$385,000. The project was completed in 7 months after the lease was signed.
